Александритовый лазер Motus AY

Applications

- ● ● ● Hair Removal
- ● ● ● Anti-Aging & Wrinkles
- ● ● ● Vascular Lesions
- ● ● ● Pigmented Lesions
- ● ● Skin Tightening

Sources

Alexandrite - 755nm
Nd:YAG Long Pulse - 1064nm
Nd:YAG Short Pulse - 1064nm

Motus AY

A Jump into the Future of Hair Removal and Vascular Treatments for all Skin Types

Motus AY is the new system which combines Alexandrite with Nd:YAG laser sources covering all applications in dermatology.

The Keys to Success:

①

Effective and Safe for All Skin Types (I to VI) or fair hair patients

②

Wide Range of Applications in One Simple Solution

③

Fast and side-effect free thanks to Moveo Technology

④

Maximum Simplicity and maneuverability

Double-Sources System: Broadening the Range of Possible Treatments

Alex (755 nm)

The only effective treatment for fine and fair hair.

Nd:YAG (1064 nm)

It penetrates deeper into the skin to be effective in vascular treatments (both face and legs).

Moveo Handpiece- Available for both Alex and Nd:YAG

The new handpiece technology integrates a sapphire tip that comes into contact with the skin, reducing the reflected energy loss. The new hair removal method consists of repeated passes on skin treated areas that cause gradual heating of the vital parts of hair.

Inside Moveo Innovation

Moveo handpiece drastically reduces the amount of energy reflected by the skin by working in contact with the skin at lower fluence. This exclusive technology is available for 3 applications.

Moveo HR: Focus on Hair Removal

The multiple passes of Moveo HR over small defined areas cause

gradual heating and destruction of unwanted hair.

Moveo PL: Focus on Pigmented Lesions

The new MOVEO PL is indicated for skin age and sun spots progressively heating the pigmented lesions.

Moveo SR: Focus on Skin Rejuvenation

The multipass controlled action of MOVEO SR causes a progressive increase in heat at dermal level, which stimulates a neocollagenic process.

Moveo VL: Focus on Vascular Lesions

The specific action of Moveo VL acts directly and effectively on vascular redness.

No Reflection = 100% Energy Absorption

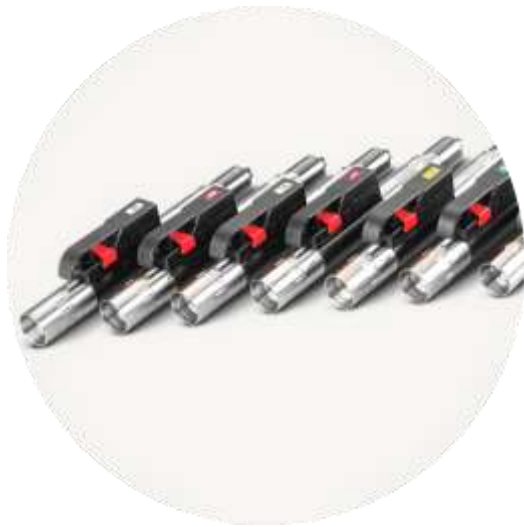

The total adherence of the handpiece on the surface to be treated resets energy dispersion, thus obtaining 100% energy absorption, which means that to obtain the same results we need lower power compared to other systems on the market.

100%

Maximum Effectiveness at Lower Power = Total Safety

The cumulative laser emission allows to deliver an amount of energy at lower power pulses, leading to hairs destruction in a way that is totally painless for the patient and free from side-effects like burning or discolouring, also in darker skin types.

total safety

Standard Handpieces

- Choose up more than 10 standard handpieces
- Different spotsizes available (2.5 - 20 mm)
- Automatic spot recognition system
- Ergonomic connector for air-cooling devices
