Фракционный лазер CO2 Glide

Applications

- ● ● Skin Surgery
- ● ● Anti-Aging & Wrinkles

Sources

CO₂ - 10600nm

Glide

Especially Recommended for

**Skin Photorejuvenation, Acne Scars, Facial
Wrinkles Reduction, Periocular Lifting Deep
Scars, Dermatological Surgery**

Glide

Especially Recommended for

**Skin Photorejuvenation, Acne Scars, Facial
Wrinkles Reduction, Periocular Lifting Deep
Scars, Dermatological Surgery**

Glide Guarantees Maximum Flexibility

The advanced technology and the complete range of scanning systems, make this device effective in many treatments and in many areas, even the most delicate like neck, the décolletage and the area around the eyes. This flexibility is especially useful in more complex treatments such as scars, cutaneous pigmentation, deep rhytids, and in the darkest skin phototypes.

Complete Range of Miniaturized Scanning Systems.

Glide has a range equipped with new scanning systems, optimized in shape, weight, easier connection and size to maximize handling.

μ-Scan DOT - Scanning system designed to ensure utmost ergonomics in fractionated or traditional resurfacing treatments (modifiable parameters: Size, stretching and scanning area shape).

μ-Scar 3 - Scanning system designed for remodelling deep scars. Minimizes the risk of post-treatment hyper and hypopigmentation thanks to the smaller spot size that generates greater depth of the action with reduced energy.

Derma Scan - Scanning system paired with handpieces with 4" and 7" focus designed for fast and tridimensional ablations.

Tailored Treatment with PSD® Technology

The core of Glide laser is an RF CO₂ source empowered by PSD® technology that can produce fractional laser pulses with variable pulse shapes, duration, energy and peak powers.

3 different pulse shapes can be selected:

SmartPulse (SP)

DEKAPulse (DP)

HighPulse (HP)

Thanks to PSD® technology the modulation of ablation and thermal denaturation is ideal for every patient's need and treatment.

Thermal Effect: Following ablation (si usa questa forma senza articolo), the CO₂ laser energy is transformed into heat propagating deep down in the derma and producing an immediate “shrinkage” of the tissues with a stimulation of new collagen production.

Ablation: The high-peak power delivered in the first part of the pulse releases a great amount of energy very rapidly, and causes immediate ablation of the epidermis and the topmost skin layers.

SmartStack Function

Thanks to the **SmartStack Function**, it is possible to emit a number of subsequent pulses in the same place (DOT) ranging from 1 to 5. The SmartStack function makes Glide one of safest and most effective systems in the market

Maximum advantages:

- Perfect control of thermal effect: Between one pulse and the next the tissue cools down, thus reducing thermal damage and the risk of undesirable side effects.
- Precise vaporization depth control: Preventing heavy bleeding, resulting in rapid recovery time and enhanced patient comfort.
