Фракционный лазер CO2 SmartXide Punto

Applications

- ● ● ● Scars
- ● ● ● Skin Surgery
- ● ● ● Anti-Aging & Wrinkles
- ● ● ● Pigmented Lesions
- ● Skin Tightening

Sources

CO₂ - 10600nm

SmartXide Punto

Especially recommended for
Coolpeel™, DOT Therapy, Periocular Lifting, Scars Treatment, Dermatological Surgery, Plastic and Aesthetics surgery

New SmartXide Punto: The Keys to Success

1

Personalized pulse shape selection thanks to PSD® technology. The four available pulse shapes and the Coolpeel mode allow professionals to choose the right pulse for any skin condition and treatment area.

2

Perfect match between downtime and results. Possibility to minimize side effects and downtime by choosing the right pulse, the right scanning mode and the SmartStack function.

3

Maximum reliability in control with minimum thermal damage and extremely rapid recovery time.

4

Trust in expertise - DEKA is a pioneer in CO₂ lasers. SmartXide Punto is a result of decades of experience.

Full Range of Treatments in Skin Rejuvenation.

Thanks to an uncompromised versatility SmartXide Punto can successfully and safely treat a full range of conditions: From the most superficial (i.e coolpeel) to the most complex case, such as scarring, surface pigmentation and deep wrinkles. Very delicate areas (such as neck and eyelids) and even phototypes with a high PIH (Post Inflammatory Hyperpigmentation) risk.

Coolpeel™ CO₂ Treatments Have Just Become a Lot Cooler

CoolPeel™ is a brand new way of delivering the benefits of a traditional CO₂ resurfacing treatment, through a safer and more comfortable approach, by targeting just the superficial layer of skin tissue.

Scar 3

The Assisted Scanner Solution for Scars

Scanning system designed for remodelling deep scars. It minimizes the risk of post-treatment hyper and hypopigmentation thanks to the smaller spot size that generates greater depth of the action with reduced energy.

Tailored Treatment with PSD® Technology

The core of Smartxide PUNTO laser is an RF CO₂ source empowered by PSD® technology that can produce fractional laser pulses with variable pulse shapes, duration, energy and peak powers.

Thanks to PSD® technology the modulation of ablation and thermal denaturation is ideal for every patient's needs and treatments.

Thermal Effect: Following ablation, the CO₂ laser energy is transformed into heat propagating deep down in the derma and producing an immediate "shrinkage" of the tissues with a stimulation of the production of new collagen production.

Ablation: The high-peak power delivered in the first part of the pulse releases a great amount of energy very rapidly, and causes immediate ablation of the epidermis and the topmost skin layers.

SmartStack Function

Thanks to the **SmartStack Function**, it is possible to emit a number of subsequent pulses in the same place (DOT) ranging from 1 to 5.

The SmartStack function makes SmartXide Punto one of the safest and most effective systems in the market.

Maximum advantages:

- Perfect control of thermal effect: Between one pulse and the next the tissue cools down, thus reducing thermal damage and the risk of undesirable side effects.
- Precise control of vaporisation depth: Preventing heavy bleeding, resulting in rapid recovery times and enhanced patient comfort.
