Лазер эстетической гинекологии Glide GYN

Applications

- Gynaecology
- MonaLisa Touch®
- Surgical V²LR

Sources

CO₂ - 10600nm

The Newest CO₂ Laser for Women's Intimate Health

Glide is the new CO₂ laser introduced by DEKA with a series of more ergonomic and highly performing accessories. This technology is ideal for the treatment of vulvovaginal problems.

Unique Features:

①

Perfect Laser-Tissue Interaction

An exclusive pulse (D-Pulse) ensures maximum effectiveness without any side effects.

②

Quick and Painless Treatment

The laser energy to the vaginal walls is provided in a fractional mode (DOT-Therapy): only a small percentage of vaginal tissue is directly affected by the laser.

③

Maximum Patient Adaptability

Availability of different types of probes to address the specific clinical and/or anatomic needs of individual patients. 360° single use probe available.

④

Maximum Reliability

Control with minimum thermal damage and extremely rapid recovery time

⑤

Trust in Expertise

DEKA is a pioneer in CO₂ lasers. Glide is a result of decades-long experience.

Set-up Complete with Scanning Systems

Glide is equipped with a full range of new scanning systems, optimized in shape, weight, and size to maximize handling.

μ-Scan V²LR

Scanning system designed to treat menopausal urogenital syndrome. Fractionated CO₂ laser energy is transmitted to the vaginal walls, effectively stimulating tissue regeneration for unequalled results.

Colposcan

This new accessory, which combines scanning system and microhandpiece, broadens Glide applications to include scan-aided colposcopic microsurgery.

The features of this compact system, compatible with all colposcopes, make this instrument the gold standard for extremely precise, safe, repeatable and fast-moving treatments.

D-PULSE - The Specific Pulse Shape for the Vaginal Mucosa

D-Pulse is an exclusive pulse shape, designed by DEKA specifically for the MonaLisa Touch® treatment, thus ensuring maximum effectiveness (by using the right penetration depth) without any side effects (control of thermal effect).

D-Pulse consists of:

- an initial portion with constant high-peak power for rapid painless superficial removal of atrophic epithelial mucosa;
- a second variable portion, with lower peak power and longer emission times, that allows the laser energy to penetrate into the mucosa and stimulate it properly in depth.
